Handbook of Positive Psychology in the Schools (second edition)

SUGGESTED READINGS: STUDENT ENGAGEMENT

Examines the engagement construct as used in extant research and proposes how to integrate perspectives to advance future scholarship.

A report that reviews and summarizes the properties of 21 measures of student engagement.

Presents a conceptual framework for student engagement that organizes current research and practice and accounts for multiple contextual influences.

A longitudinal study of student engagement trajectories, which differed by sex, SES, and race/ethnicity. Trajectories were associated with negative outcomes.

A cross-sectional study with a large diverse sample that demonstrates school assets have an impact on student engagement above and beyond the impact of internal assets, regardless of family functioning.
